

Introduction: ISYmap

Aurélien BALLIER – CEO
ballier@isymap.com

ISYmap - Technology Provider/Developer/Integrator

We are a French SME developing sensors and robots for:

- Nuclear and hydroelectric industry.
- Defense and homeland security.

Challenges - ISYroll / Nono

Challenge we want to address:

- (4) Inspection and Maintenance of Plants, Infrastructure Areas, and Linear Infrastructure
- (5) Inspection and Maintenance of Industrial and Public Sector Assets and Equipment

Our offer:

- ISYroll is a miniature robot (fits into 100 mm diameter pipes)
- shock proof (one meter fall) and waterproof (IP67),
- including long-range communication,
- with UHD (4k) camera,
- optional radiological sensors.

Partnerships - Expertise

We are looking for end users and the following expertise :

- Sensors for plant inspection (i.e., ultrasound structure inspection).
- Data analysis tools (i.e. AI tools for image structure analysis).
- Innovative mobility systems (i.e., wall climbing wheels).
