## Advancing human-robot collaboration in a user-centric manner

### 07/2025 Newsletter

**Special session at EMO Hannover 2025, organised by  
EARASHI and JARVIS.**

Dear follower,

Manufacturing is changing—and fast. With AI, robotics, and automation becoming part of everyday operations, we're seeing a real shift in how factories run, how businesses stay competitive, and how people work.

But as the tech moves forward, so do the big questions:

- What does this mean for workers on the ground?
- Which sectors will adapt and thrive—and which might fall behind?
- And how can industry, education, and policymakers work together to make sure no one's left out?
